EDUCATION

Master of Computer Application,
Christ Academy Institute for
Advance Studies
2022 – present | Bangalore, India

Bachelor of Computer
Application, VEIT Degree college
2018 – 2021 | Bangalore, India

COURSES

Complete Data Science,
Geeksforgeeks
Bangalore, India

AWS practitioner,
GeeksforGeeks
Bangalore, India

CERTIFICATES

Data Science/Machine Learning
with python
GIT, Hubli

Full Stack development by
printston

Web Designing

Googles- AI Builder Lab 

AWS Awesome Day Certificate

PROFILE

Experienced in developing and implementing data-driven solutions, with a strong focus on machine learning and data analysis. I have successfully completed a web-scraping project, gaining hands-on experience in data extraction, cleaning, and processing. Additionally, I have participated in high-profile hackathons like the ISRO Hackathon and the NASA Hackathon, where I collaborated with interdisciplinary teams to solve complex problems using cutting-edge technology. With a strong foundation in programming and a passion for innovation, I am eager to apply my skills in machine learning to solve real-world challenges.

PROFESSIONAL EXPERIENCE

AffordPlan, Financial Councilor

February 2022 – December 2022

- Managing Hospital Dashboard
- Getting leads from customer data form affordplan app
- Second Highest grossing hospital award(PAN India)

Skillible, Generative AI Virtual Internship

July 2024 – September 2024

Fundamentals of GenAI Technologies

Scale AI (Freelancing),

Native Language AI Trainer - Kannada

present

- Training Generative AI models
- Factuality, Vebosity and Explicit Contents Generation check
- trained Googles gemini 1.5 model as well
- All training is done using outlier.ai  tool

PROJECTS

Rooftop Solar Power Generation using Machine Learning, **(Team work)**

- Helps getting solar power generation estimations
- real-time rendering according to weather condition
- used U-Net and ML algorithms for image classification and training.

Market Analysis tool using webscraping

- Extract Data from E-commerce sites
- Makes a data sheet for data analysis
- Used Selenium, flask, react.js, MySQL
- Display all the products on screen with link for each product

Sentiment Analysis using NLP

- Analyze sentiment with tokenized stopwords

Social Media (UG Project)

- Can let a user post stories and manage thier own profile
- Like, Comment and share a post
- used MySQL, PHP and XAMPP

Rental Cars(UG Project)

- Built using PHP, MySQL and .NET framework
- Admin can update add, delete, update car details

SKILLS

Python: Flask | Pandas | Numpy

| Selenium | BeautifulSoup4 •

Machine Learning: Matplotlib |

Sci-kit learn | seaborn •

DBMS: MySQL | MonngoDB |

postgres •

Deep Learning: Tensorflow | U-

net • **Javascript:** React.js •

Generative AI: Transformers |

RAG | LLMs • **Excel** •

Tableau • **AWS Cloud**

- User can rent cars and pay bills

HACKATHONS AND COMPETITIONS

TCS National Qualifier Test 

Scored 72.21%

Bharathiya Anthariksh Hackathon-ISRO 2024

NASA Space Apps Challenge

Web Designing,, Sursungram 2023

Chess Competition, Winner
